MaC Entry Systems include your selected door design, 4-9/16" primed exterior door frame, primed brickmould, high dam sill, compression weatherstrip, (3) 4 x 4 zinc dichromate hinges. Door will be bored for a lockset with a 2-1/8" face bore and a 2-3/4" backset. All doors will have a door sweep attached. Mortise edge prep on steel doors will be square edge. All wood edge doors will have a radius mortise edge prep.

Continuous Head, Sill and Mull System

Utilizing a continuous head, sill and one piece ("Fatboy") mull assembly maximizes the stability and rigidity of any sidelited unit. This continuous system also simplifies assembly and virtually eliminates racking and bending of the unit.

Note: Mill (aluminum) finish is standard on all sills. Brass or bronze finishes are available for and additional upcharge.

High-Dam Adjustable Sill

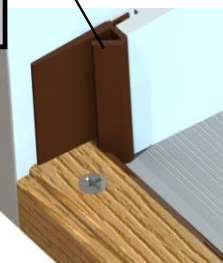

High-dam sill create a positive barrier to water infiltration. The high-dam design feature holds back the inevitable rise in the water level against the threshold as wind speed increases. Combining high-dam technology with a high quality bottom seal, securely protects the bottom of the door unit from air and water infiltration.

The adjustable cap feature allows for easy field adjustments. High quality metallic and composite materials are featured for rot-resistance and protection against harsh weather conditions. Fixed bumper and low-profile designs are also available to meet outswing or handicap accessible applications.

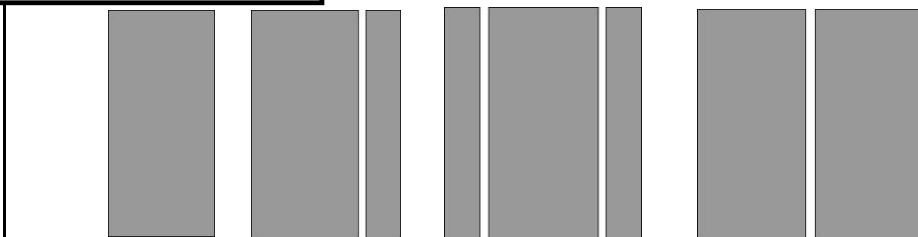

High-Performance Weatherstrip

Vinyl-wrapped, foam filled, compression weatherstripping and corner seals are added to the door frame providing protection against air and water infiltration.

McMahon & Company Will Match To Your Color, Please Call Our Customer Service Department For Information

Samples Are Sent For Confirmation The Color Is Exactly As Required, Signed Verification Returned Before The Unit Can Be Produced

Special Note:

Placing Plastic Frames Behind A Storm Door Or Painting A Dark Color Can Result In Warping And Twisting
Extremely High Heat Conditions, Some Distortion Or Warping Could Occur. This Type Of
Application Will Void The Limited Warranty.

All Glass Lite Frames Are HP (High Performance) And Are Designed To Obtain The Best Sun UV and Heat
Resistance To Cracking Or Warping

Finish Paint Colors Will Vary From Clad Frame Colors, Processes And Paint Material Are different In Each Application

Care and Maintenance of Prefinished Exterior Doors:

Painted Finish: Surface should be washed with warm soapy water with minimal rubbing.

Stained Finish: After one year, homeowner should apply a clear coat of exterior UV inhibitor poly urethane on outside of door to prevent from flaking or peeling. This should be repeated every one to two years to prevent fading or flaking because of sun damage. McMahon and Company's stained exterior doors are not considered a maintenance free finished product. Finishes left without maintenance will show signs of fading or peeling and are not considered a manufacturer's defect.

All dark surfaces will eventually show some fading.

A one year warranty will be given on painted or stained doors against peeling or flaking of all finished coats.

Excluded in warranty:

- * Poor Factory primer that peels
- * Sun damage due to exposure, especially on dark painted and stained surfaces
- * Damage caused by heat buildup between door and storm door
- * All plastic surrounds
